Additional

Significant Changes

Once **verification** statement has been granted, any significant changes that materially affect the yearly verification statement must be communicated to Intertek within 5 working days. These include changes relating to:

- Legal, commercial, organisational status or ownership
- Organisation names contact address and site details
- Material changes in scope or boundary of reporting
- Change or addition of the emissions, removals and storage of the site or facility are material to the GHG statement
- Significant changes in the data management involving the specific site or facility
- Unexplained material changes in emissions, removals and storage
- Serious events that impact the integrity of the statement
- Any other changes that render the information of the statement materially inaccurate

Clients shall seek advice from where there is doubt over the significance of a change. Intertek will assess the changes and determine whether site visit is required to confirm the accuracy of the **verification** statement in place. Should a visit be required a further fee will be payable.

Any changes to **verification** statement will be communicated to intended user the fact that reliance of the original statement can be compromised given the new facts or information.
